19 HD voice (W-AMR) mobile phone suppliers

Acer, AETA Audio Systems, Apple, Asus, Blackberry, Gigabyte, Glensound, HTC, Huawei, LG, Longcheer, Motorola, Nokia, Pantech, Samsung, Sony, TCL, TechFaith, and ZTE

Updates are welcome: email to info@gsacom.com

IMPORTANT NOTES TO THIS REPORT

1/ Some phones are operator specific only, and may not be available for use on all HD Voice mobile networks or in all markets. Activation of the W-AMR codec may be required. Some phones will require the latest software to be installed.

The information contained in this report is therefore indicative only.

Always check directly with the suppliers directly for device specifications and commercial availability for your specific market and business requirements.

2/ The majority of phones are suitable for delivery of W-AMR enabled HD voice service on 3G/HSPA networks. A small number are also compatible for HD voice service on GSM networks where supported by the network.

3/ Several VoLTE phones are included that incorporate the W-AMR codec for use when HD voice service is offered to LTE subscribers, as is the case by the three South Korean operators. The letters after the model name have the following meaning: K = KT; L = LG U Plus; S = SK Telecom. Other letters denote specifications for other operators, However, at this stage neither VoLTE nor HD voice service may be commercially available on their networks.

4/ For further analysis of the phones listed in this report, authorised users should refer to the new GAMBoD-HDV database which can be accessed at <http://www.gsacom.com/gambod>

5/ For more detailed information about the VoLTE devices listed in this report, please refer to the GAMBoD-LTE database (authorised users only).

5/ Errors and Omissions Excepted
